

Daon®

Convenient, Fast, Secure Authentication

Founded in 2000, Daon is a leading provider of biometric authentication and identity assurance solutions focused on meeting the needs of enterprise and public-sector customers worldwide. We have pioneered methods for securely and conveniently combining biometric and identity capabilities across multiple channels and empower our customers and their users to choose the combination of factor(s) that best meets their situational needs and preferences. Our products are scalable, flexible, and proven in the most challenging real-world environments, **securing more than 900 million identities around the globe.**

Daon's IdentityX® combines the **rapid lower-cost launch** capability of an out-of-the-box solution with the **personalization** needed today to navigate current and emerging client preferences. IdentityX simplifies the authentication lifecycle management process from initial account opening throughout the identity lifecycle so that clients can safely login, reset credentials, transfer funds or conduct other transactions of consequence.

Benefits

- Increase Revenue
- Customer Inclusion
- Future Proofed
- Replace Passwords
- Reduce Fraud
- Prevent Breaches
- Reduction in Call Center Costs
- Enable UX via Self Service

Why IdentityX

Our customers choose the IdentityX platform solution for the following key core capabilities:

- **Multi-modal.** Supports face, voice, fingerprint, behavioral, and palm biometrics. Vendor agnostic – we can support algorithms of other vendors, ensuring a “best of breed” solution.
- **Liveness.** Supports multiple liveness detection algorithms for face and voice.
- **Extensive policy control** over all aspects of authentication: modality(s), match thresholds, attempts, device capabilities. This provides our customers maximum flexibility in balancing convenience for users with the security required for high-value transactions.
- **Multi-tenant.** Allows different population segments (departments, user groups) to be managed independently of each other. With separate administrators and data segregation.
- **Scalability.** Our core technology has scaled to populations of hundreds of millions. USAA has reported no-problem at a peak load of 750,000 authentications in a day with IdentityX.
- **High-Availability.** Can be deployed in highly-available and disaster recovery configurations.
- **FIDO.** IdentityX can be configured as a FIDO UAF and U2F Server and has been certified in this configuration.
- **Flexibility.** Platform independent: Windows or Linux, Oracle or SQL Server. Runs on commodity hardware - no special requirements. Provides flexible integration options (SOAP/ Restful APIs), match-on-server or match-on-device, configurable authentication policies, supports in-band and out-of-band use cases.
- **Omni-channel.** Can be integrated into an enterprise to give a consistent authentication experience across different channels/use cases: mobile, website, ATMs, call-centers, in-person, etc.

The IdentityX platform is the core basis for an omni-channel approach to authentication that can be utilized by clients globally

Companies Leveraging the Many Benefits of IdentityX

Use Cases

- Digital Onboarding
- Mobile Login
- Password Reset
- Call Center
- Payments
- Continuous Authentication

About Daon

Daon is an innovator in developing and deploying biometric authentication and identity assurance solutions worldwide. Daon has pioneered methods for securely and conveniently combining biometric and identity capabilities across multiple channels with large-scale deployments that span payments verification, digital banking, wealth, insurance, telcos and securing borders and critical infrastructure. Daon's IdentityX® platform provides an inclusive, trusted digital security experience, enabling the creation, authentication and recovery of a user's identity and allowing businesses to conduct transactions with any consumer through any medium with total confidence.
